I have also considered/ obtained such other analysis, review, explanations and information considered reasonably necessary for our exercise, from the Client or other public available sources.

Chapter 4: Selection of Valuation Methodology

There is no single definition of the term 'Value' that is suitable for all purposes or at all times. The value of a particular asset may vary according to different valuation methodologies that are adopted to ascertain the value for a specific purpose. Valuation of securities is an inexact science. It may sometimes involve a set of judgments and assumptions that may be subject to certain uncertainties. In the section below, Independent Registered Valuer has discussed some of the commonly used valuation methodologies. The valuation methodology to be adopted varies from

case to case depending upon different factors affecting valuation. There are a number of methodologies to value companies / businesses using historical and forecast financials of the company.

A typical valuation analysis involves review and analysis of historical financials of the company and broad comparison of the company's forecast financial projections as regards all the significant macro and micro variables like economy and industry growth rate assumptions, inflation, interest and foreign exchange rates and tax rate forecasts. Company's profitability factors (industry competitive factors and company's operating strategies and its competitive position in the industry), economies of scale and optimal capital structure also affects the business valuation of the company.

However, the value is specific to the point in time and may change with the passage of time. In the present case, the objective of the valuation exercise is to value the shares of FCIL.

The valuation exercise is aimed at the assessment of the Fair Value of equity shares /equity linked securities of the company. I am required to arrive at the above valuations based on internationally accepted valuation practices.

As per <u>RICS appraisal Manual</u>, the Fair Value (FV) is defined as 'The price that would be received to sell an asset, or paid to transfer a liability, in an orderly transaction between market participants at the measurementdate.

<u>Ind AS (113) as well as IFRS 13</u> defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

Approach and Methodology

Valuation is not an exact science and is dependent on various factors such as specific nature of business, economic life cycle in which the industry and company is operating, past financial performance of the business, future growth potential of the business, business model, management of the company, relevance of technology in the business model, liquidity of equity and much more. The results of the valuation exercise may vary significant depending on the basis used, the specific circumstances and the judgment of the valuer. In respect of going concerns, certain valuation techniques have evolved over time and are commonly in vogue.

Various techniques may be used such as Net Asset Value Method, Price-Earnings Multiple Method among others to value. The choice of valuation approach depends on the purpose of valuation and various other business specific and industry specific factors. In some cases, a single valuation technique will be appropriate, whereas in others multiple valuation techniques will be appropriate.

The established methods of valuation and a brief description of each method are provided below.

Method of Valuation

There are several commonly used and accepted methods for determining the value of business/shares of the company, which would be applied to the present case, to the extent relevant and applicable, such as:

- Net Asset value or Breakup value based on the value of the assets and liabilities (NAV).
- Value based on the Profit Earning Capacity Value (PECV) method.
- Value based on Market Price method.

Asset Approach - Net Asset Value Method (NAV)

The Net Asset Value method attempts to measure the value of the net assets of the company against each share. It is computed by taking the net value of the company's assets, subtracting from them the amount of liabilities and preferred shareholders claims, and dividing the reminder amongst the number of equity shares. For an investment company valuation, NAV valuation, based on the asset backing is generally given more importance. Net Asset Value Method is also considered appropriate, where the future cash flows / commercial operations of the valued company cannot be reasonably ascertained or the company is recently incorporated.

The calculation is appended herewith as per Annexure 1.

Valuation under Profit Earning Capacity Method:

This method of valuation presumes the continuity of business and uses the past earnings. For the purpose of the Profit Earning Capacity Value of the shares, the commonly accepted approach is to capitalize average earnings of past at an appropriate rate of capitalization, to arrive at a fair value per share.

While calculating Average Earning Per Share, the Audited Financial Statements for the year ended March 31, 2021, March 31, 2022 and March 31, 2023 is taken into consideration.

However, this method has not been used for Valuation of Shares of FCIL since FCIL incurred losses in 2 out of 3 immediately preceding financial years i.e. incurred losses in financial year 2022-23 and 2021-22.

The calculation is appended herewith as per Annexure 2.

Market Approach -Comparable Company Multiples Method (CCM)

Market Price Method

In the instant case, the Equity Shares of the Company are listed on BSE Limited. Hence, we have obtained trade data from BSE Limited. The Equity Shares of the Company are frequently traded within the meaning of explanation provided in Regulation 164 (5) of Chapter V of the SEBI (ICDR) Regulations, 2018. In terms of Regulation 164 (1) of Chapter V of SEBI (ICDR) Regulations, 2018, for calculation of market value, we have considered higher of the following:

- i. the 90 Trading days volume weighted average price of the equity shares of the Company quoted on the Stock Exchange preceding the Relevant Date i.e. 9th February, 2024; or
- ii. the 10 Trading days volume weighted average price of the equity shares of the Company quoted on the Stock Exchange preceding the Relevant Date 9th February, 2024.

The calculation is appended herewith as per Annexure C.

Chapter 5: Valuation

These valuation conclusions must be read along with accompanying assumptions, caveats, limits and disclaimers mentioned elsewhere in this report.

As per our assessment, the Fair Value of the company as per three approaches is as follows:

Valuation of Equity Shares:

Method	Price Per Share	Weight	Product	
	(In Rs.)	E TO BE SEED OF SEED O		
Net Asset Value	18.27	1		18.27
P.E. Capacity Value	-		-	-
Market Value	58.24	2	2	116.47
-		3	3	134.74
Per Share Value (In Rs.		44.91		

Conclusion - Fair value of FCIL Limited

"If the asset takes the form of fully paid shares, the valuation will take into account not only the terms of the agreement but a number of other factors, such as prospective yield, marketability, the general outlook for the type of business of the company which has allotted the shares, the result of a contemporary prospectus offering similar shares for subscription, the capital position of the company, so forth. There may also be an element of value in the fact that the holding of the shares gives controlof the company. If the asset is difficult to value, but is nonetheless of a money value, the best valuation possible must be made. Valuation is an art, not an exact science. Mathematical certainty is not demanded, nor indeed is it possible."

Based on the above workings, the calculation of the fair value of the equity shares /equity linked securities of **FCIL Limited** is as under:

For the purpose of preferential issue of equity linked securities, the Fair Value of the Equity shares comes to Rs. 44.91/- per equity share only.

The values so arrived at are subject to the matters enumerated in 'Disclaimer statement', 'Scope of Work & Limitation' and information provided to us and should be viewed in the light thereof.
